Muhammad Saad Ayub

AI ENGINEER

Shiekhupura, Pakistan | realsaadayub@gmail.com | +923013222808

Summary

AI Engineer certified by Microsoft with hands-on experience in building, deploying, and optimizing machine learning models and automation bots. Proficient in leveraging large language models (LLMs), NLP frameworks, and AI APIs to develop intelligent tools for real-world business applications. Known for creating streamlined, user-centric AI solutions that enhance automation, reduce manual effort, and improve decision-making.

Professional Skills

- Problem Solving & Critical Thinking
- AI Solution Design & Deployment
- Project Planning & Execution
- Requirement Analysis
- Communication & Client Collaboration

Technical Skills

- Programming Languages
- AI & ML Frameworks
- Libraries & Tools
- Automation & Integration
- Development Workflow

EXPERIENCE

Freelance AI Engineer, *Upwork*   **Feb 2024 – Present**

- Designed and deployed custom AI agents and automation bots tailored to client requirements.
- Created GPT-based assistants for tasks like email generation, chatbot interactions, and data parsing.
- Integrated AI tools with third-party platforms including Reddit, WhatsApp, and internal dashboards.
- Developed front-end interfaces using Streamlit for interactive client use.

Sales Executive, *Rank Orbit LLC*   **Feb 2023 – Jun 2024**

- Sold AI-powered business automation solutions tailored for startups and SMEs.
- Managed client relationships, ensuring consistent delivery and satisfaction of technical solutions.
- Worked cross-functionally with tech teams to align product capabilities with client pain points.

PROJECTS

Google Ads Center Automation   **March 2025 – April 2025**

- Developed an automated system to extract user ad profiles from Google's My Ad Center across multiple accounts.
- Built using headless browsing and scripting in Python to run autonomously from a NAS environment.
- Enabled data export in CSV format for analytics, ensuring the process is secure, efficient, and error-free.
- Designed for single-execution runs via VS Code terminal, requiring no manual intervention or UI dependency.

Spanish Text-to-Speech Tool   **October 2024 – November 2024**

- Built a translation and TTS application for converting text to Argentinian Spanish and exporting audio.
- Combined Python's NLP tools and TTS APIs into a simple user-facing app using Streamlit.

Reddit Automation Bot   **October 2024 – October 2024**

- Developed an undetectable AI-powered Reddit agent for content interaction and moderation.
- Ensured bot-generated comments mimic human behavior to bypass Reddit's spam filters.
- AI Real Estate Chatbot
- Created backend for a property-focused chatbot capable of natural conversation and data recall.
- Used MongoDB to store user interactions for future personalization and analytics.

EDUCATION

Bachelor of Science in Computer Science   **May 2022 – June 2026**

National College of Business Administration & Economics

Current CGPA: 3.2

ADDITIONALL INFORMATION

Languages: English
Certifications: Microsoft Certified Azure AI Engineer Associate, Advanced Python Programming
